

MIRROR
MIRROR

ON
THE
WALL

Mirrors are a wondrous union of form and function. They reflect our world back to us in a transformative way that makes any space feel expansive. When light is refracted off the surface of the glass, a glorious symphony of shape and color ensues.

Modern interpretations of the looking glass have adapted to trends in the design world, becoming sophisticated expressions of style. Come with HG Arts as we explore the evolution of this remarkable medium and share in our enthusiasm over the latest stunning additions to our line of mirrors!

CUSTOM PRINTED

There is something transcendent about printed mirrors. Reflective glass gives life and luster to any image, bending the light around it in amazing ways. While the technique of printing on mirror is not new, we've continued to explore this process in exciting new directions.

The application of printed mirrors as art pieces continues to trend strongly across our Hospitality, Healthcare and Residential markets.

When it comes to subject matter, the possibilities are endless. In close collaboration with our clients, we've designed printed mirrors of all shapes and sizes that artfully incorporate regional and thematic elements. The end result is always a sensational spectacle guaranteed to capture attention!

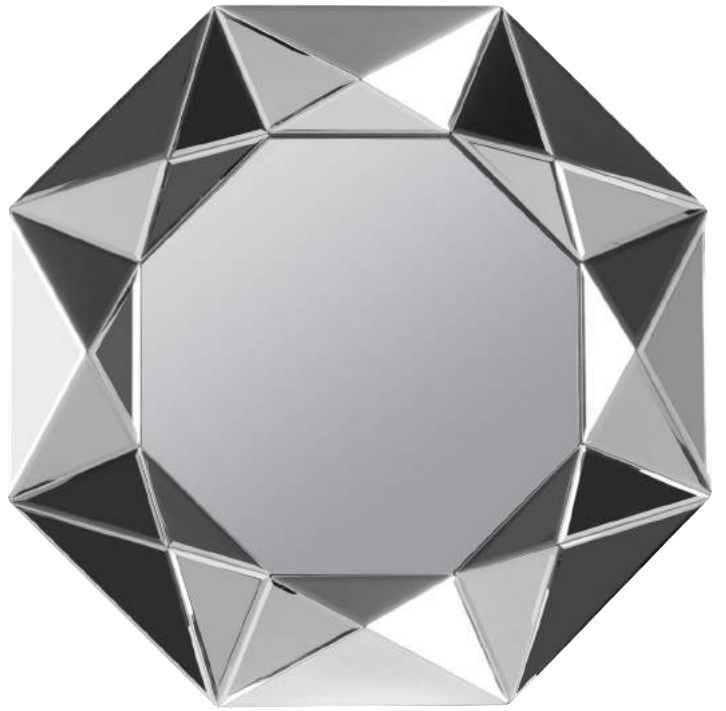

DIMENSIONAL

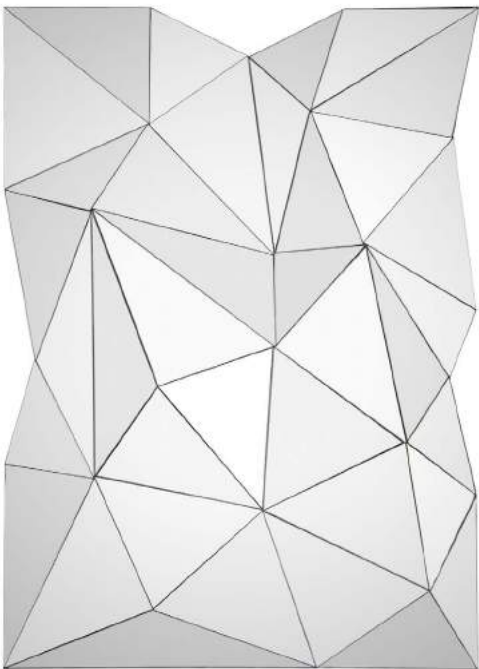

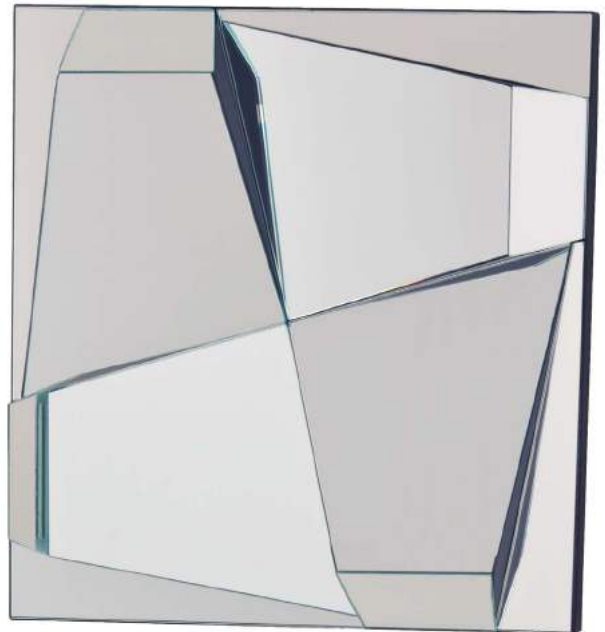

Woven Reflection

Geometric Rays

Faceted Fusion

Abstracted Vision

FRAMELESS

Oppulent Manor

Modern Fairy Tale

Rose Garden
